EVIS EXERA III

EVIS EXERA III BRONCHOVIDEOSCOPE

BF-1TH190

Therapeutic bronchoscope with superb HDTV image quality and a 2.8 mm instrument channel

Main Features

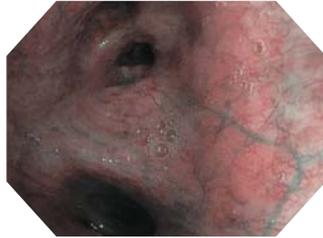

HDTV

Extremely clear HDTV images enable more detailed observation of bronchial surfaces.

NBI (Narrow Band Imaging)

NBI is an optical image enhancement technology that improves the visualization of vessels on the mucosal surface. NBI is now 50% brighter compared to previous models.

Electronic magnification

Electronic magnification of 1.2x and 1.5x is now possible, allowing closer observation.

Insertion tube rotation function

The insertion tube can be rotated left or right up to 120 degrees by simply turning a ring on the control section of the scope. This supports easier operation and smoother insertion with less operator fatigue.

Waterproof one-touch connector

A new connector design minimizes the effort required for setup prior to and in between cases. In addition, it is fully submersible and eliminates the need for a water-resistant cap and the associated risk of an expensive repair due to accidental immersion.

Ergonomic scope cable direction

The angle of direction of the universal cord has been improved so that the scope cable does not hang limp, even if the video system is located behind the bronchoscopist.

Specifications

Optical System	Field of view	120°	
	Direction of view	Forward viewing	
	Depth of field	3-100 mm	
	Image quality	HDTV	
Insertion Tube	Distal end outer diameter	6.2 mm	
	Distal end enlarged		
	Insertion tube outer diameter		6.0 mm
	Working length		600 mm
	Insertion tube rotation function		Yes
	Channel inner diameter	2.8 mm	

Instrument Channel	Minimum visible length	3.0 mm from the distal end
	Direction from which EndoTherapy accessories enter and exit the endoscopic image	
Bending Section	Angulation range	
Electro-Cautery instrument Compatibility	Yes	
Laser Compatibility	Nd: YAG, 810nm diode	
Compatible EVIS EXERA System	Video System Center OLYMPUS CV-190 Xenon Light Source OLYMPUS CLV-190
